

Campaign Update #35: Construction Updates

We officially broke ground for the new SMCHS on September 17, but we are already working on Saints Drive! Check out the progress on the new SMCHS campus and the demolition project happening at St. Mary's Church/Grade School to make room for the new addition.

Saints Drive:

It's not open to the public yet - but we have a paved road, curbs and gutters!

This is where our new top-loading Saints gymnasium will be located.

Construction equipment has also been working on the parking lot area.

St. Mary's Church/Grade School:

The annex (former Dry Cleaners) and apartment buildings on the corner of the block have been demolished to make room for an addition to the school. LaMere Learning Center (in the tan brick building on the right side in the photo below) is relocating in January and the building will be demolished in 2018. The construction of the new addition will begin in the spring.

Contractor Pre-Bid Meeting:

We recently held an open meeting for potential contractors to learn about the new SMCHS bidding process and opportunities for in-kind donation projects.
